EUPHM

CAPABILITY CATALOGUE · 2026

Supplement manufacturing, from formula to export-ready pack.

OEM and ODM production for capsules, tablets, softgels, powders, gummies, liquids, sachets and effervescents. One audited site, one quality system, one accountable team.

GUANGDONG · CHINA

SALES@EUPHM.COM

A contract manufacturer, not a brand owner.

EUPHM develops, manufactures and packs dietary supplements for brands that sell through pharmacies, health stores, gyms and online. We do not sell our own supplement brand, so our only product is the one we make for you.

What we do

OEM production to your finished formula. ODM development from a brief. Private-label packing. Export documentation and DDP delivery.

Who we work with

Pharmacy own-label teams, DTC brands, sports nutrition companies, distributors and supplement brands entering a new market.

What we don't

Copy a competitor's protected formula, broker work without our own lines, or claim a certificate we cannot produce.

Where we ship

The US, EU, UK, Gulf, Asia-Pacific and Latin America — with market-specific labels, documents and certificates.

23	3,000+	500M+	45
YEARS MANUFACTURING	FORMULAS DEVELOPED	UNITS PER YEAR	EXPORT MARKETS

One site

32,000 m² production floor, separate halls for each dosage form.

One system

GMP, ISO 22000 and HACCP systems across every line.

One owner

A named contact from brief to shipment — not a shared inbox.

Dosage forms and commercial starting points.

Indicative minimums and lead times. Final terms depend on formula, packaging and raw-material availability; they are confirmed in the quotation.

FORMAT	TYPICAL SPECIFICATION	MOQ	LEAD TIME
Capsules	Hard shell, 0–000, HPMC or gelatin, 6 filling lines	1,000 units	15–25 days
Tablets	Direct compression, wet granulation, coated, chewable	1,000 units	15–25 days
Softgels	Fish and plant oils, emulsions, enteric, chewable	3,000 units	20–30 days
Powders	Stick packs, tubs, sachets, instant and agglomerated	500 kg bulk / 1,000 sticks	15–25 days
Gummies	Pectin and gelatin, sugar-free, 2–8 g pieces, 3D moulds	3,000 units	20–30 days
Liquids	Syrups, tinctures, MCT oils, drops	1,000 units	15–25 days
Sachets & sticks	Single-serve powder and granule filling	1,000 units	15–25 days
Effervescents	Tablets and powders, tubes or single-serve	3,000 units	20–30 days

Sampling

5–10 working days for a bench sample, with a specification sheet and sample-batch analytical data. Sample fees, where they apply, are credited against the first production order.

Scale-up

The production run uses the same master formula and specification as the approved sample. No silent substitution between sample and bulk.

Tested at every stage. Documented for every batch.

Raw materials stay quarantined until tested. Finished goods are released only against a signed certificate of analysis.

Testing panel

Identity & assay — HPLC, GC and titration confirm each active at the claimed strength.

Microbiology — total plate count, yeast and mould, E. coli and Salmonella on every finished batch.

Heavy metals — lead, arsenic, cadmium and mercury against USP <232> limits.

Physical — weight, hardness, disintegration, dissolution and fill volume per batch record.

Stability — accelerated (40°C / 75% RH) and real-time studies support the shelf-life claim.

Certificates & registrations

GMP
Good Manufacturing Practice

ISO 22000
Food safety management

HACCP
Hazard analysis & critical control points

HALAL
Product-specific certification

KOSHER
Product-specific certification

FDA
Facility registration — not an approval

Full certificate copies, issuing bodies and validity dates are supplied with a quotation or audit pack.

DOCUMENT PACK

COA · specification sheet · stability summary · allergen matrix · country-of-origin declarations · FDA registration confirmation · halal / kosher certificates per SKU.

Retail-ready packing, export-ready documents.

Primary packaging

PET and HDPE bottles, blister packs, stick packs, sachets, jars, tubes and cartons. Induction seals, desiccant, child-resistant closures and tamper evidence available.

Secondary packaging

Retail cartons, display cases, shippers and pallet configurations. Artwork checked against your market's label requirements before print.

Shipping terms

FOB, CIF or DDP. We ship from Shenzhen and Guangzhou ports and quote the port pair that fits your destination.

Export documents

Commercial invoice, packing list, bill of lading, certificate of origin, health certificate and the product certificates your market requires.

TERM	WHAT IT MEANS	WHO ARRANGES
FOB	We deliver to the named port; you arrange the main carriage.	Buyer
CIF	We arrange carriage and insurance to the destination port.	EUPHM
DDP	We clear import and deliver to your warehouse; duties and taxes as quoted.	EUPHM

Lead time, from approval

Production runs 15–25 working days after written approval of artwork, specification and physical sample, and receipt of the deposit. Gummies and softgels typically need 20–30 days.

05 / START A PROJECT

Tell us what you want to launch.

Send the dosage form, actives, target market, packaging and expected first-order volume. We reply with a formulation route, indicative pricing and a realistic lead time — usually within one working day.
